# ICT for High Security

Secure **what matters most** with an ASIAL Class 5 certified solutions. Designed to meet the highest standards of security, provide unparalleled protection for critical environments, and ensure peace of mind for organizations with the most demanding security needs.

What is ASIAL Class 5 Certification?

> ASIAL Class 5 certification is the gold standard for security systems in Australia and New Zealand

> Based on the AS/NZS 2201.1:2007 standard for intruder alarm systems

> A whole solution implementation, not just the technology

> Requires rigorous testing and strict compliance

> Intended for environments where any breach could result in catastrophic consequences – such as government agencies, banking institutions, data centers, correctional facilities, energy utilities, and other critical infrastructure

Key Features

State-of-the-art encryption and protection. Support for both PIN and biometrics, encrypted remote access, and advanced rolling key encryption ensures secure operations and prevents cyber attacks.

Uncompromised communication and uptime. 99.95% guaranteed uptime and polling every 20 seconds means the system remains connected to the monitoring station. Encrypted data transmission adds an extra layer of defence.

Comprehensive system support. "As-built" documentation, end-user training, full warranties, and mandatory annual maintenance for compliance and peace of mind.

Why Choose ICT for Class 5 Solutions?

ICT has earned ASIAL Class 5 certification, demonstrating the capability to provide a high-security solution to defend against today's most pressing threats. Our certified Protege systems and products have been thoroughly tested to meet and exceed the rigorous requirements associated with Class 5. Choosing ICT means you get reliable, advanced technology, and enduring protection for your organization.

Products Covered Under ICT's Class 5 Certification

From controllers to keypads and card readers, ICT has a comprehensive range of products certified for Class 5 compliance, including:

> Protege GX and Protege WX controllers and software

> TSL and tSec card readers, and Protege Touch Sense keypads

> ArmorIP internet monitoring

> ICT DIN Rail enclosure

Who we are

We believe in the confidence and peace of mind that comes from a feeling of true security.

> My vision is to make access, intrusion, and automation easy for our customers. A lot of security products are complicated and only offer one service. Our driving idea is that you create success – and value – when you combine them into a unified solution.
> **- Hayden Burr, Founder & Chief Innovation Officer, ICT.**

Integrated Control Technology (ICT) is an award-winning global manufacturer of security solutions. For more than 20 years, ICT has led the way with their unified systems for access control, intrusion detection, and building automation.
